6.8.2 Ilya Sutskever

- 6.8.2.1 Companies Working Together

6.8.2.1 Companies Working Together

1. Companies will start working together on safety
2. At some point AI
3. What should companies aspire to build ?: Self improving AI. Why did this happen ? Because there is fewer ideas than companies
4. The AI that is robustly aligned to sentient life instead of human life. In that way in some way it will be an easier case than human life alone since AI's will be sentient as well (Or will they ?)
5. We model others with the same circuit with the same circuit that we modeled ourselves
